Isn't always easy to detect...

Plagiarism has been around for centuries, but its impact has escalated with the growth of the web, which offers a vast range of content and easy opportunities for

cut-and-paste.

Sophisticated online services can help detect web-based plagiarism, but long-term deterrence requires appropriate course design and institutional policies.

Netskills offer practical training in effective methods of deterring and detecting plagiarism, through both technology and design.

- Practical workshops
- Training materials
- Advice and consultancy
